Re: Cleaning and Sanitizing of the Vehicles during the Shut Down of Service

To all Drivers:

Attridge Transportation initiated a thorough sanitizing of all vehicles with the shut down of service in March. This was supplemented by a cleaning of all vehicles during July and August. 30+ students and drivers were hired to complete this task to ensure that each driver returning in September would receive a clean vehicle.

Immediately notify your Operations Manager if you believe your assigned vehicle was missed during the cleaning sessions. The Operations Manager will inspect the vehicle and take any remedial action necessary to resolve the issue.

You should thoroughly sanitize your vehicle upon pick-up for the start of service. Please follow the sanitizing protocol detailed in the document Health and Safety Guidance During Covid-19 for Attridge Transportation.
